    i. Teaching Session
    ii. Hands on Practice through Hyper V Machine
    iii. Simulation Exam
    iv. Test Prep Exam
    v. Video

Overall Comments:

Students in my class are very curious and interested in terms of learning Microsoft Windows Server 2012. Most of the student have solid background in Information Technology, so the process of learning are quite easy and have very good attention from the participant. Because some students busy with their work, so they cannot always attend. Average student attendance for weekday class are 23-25 per session.
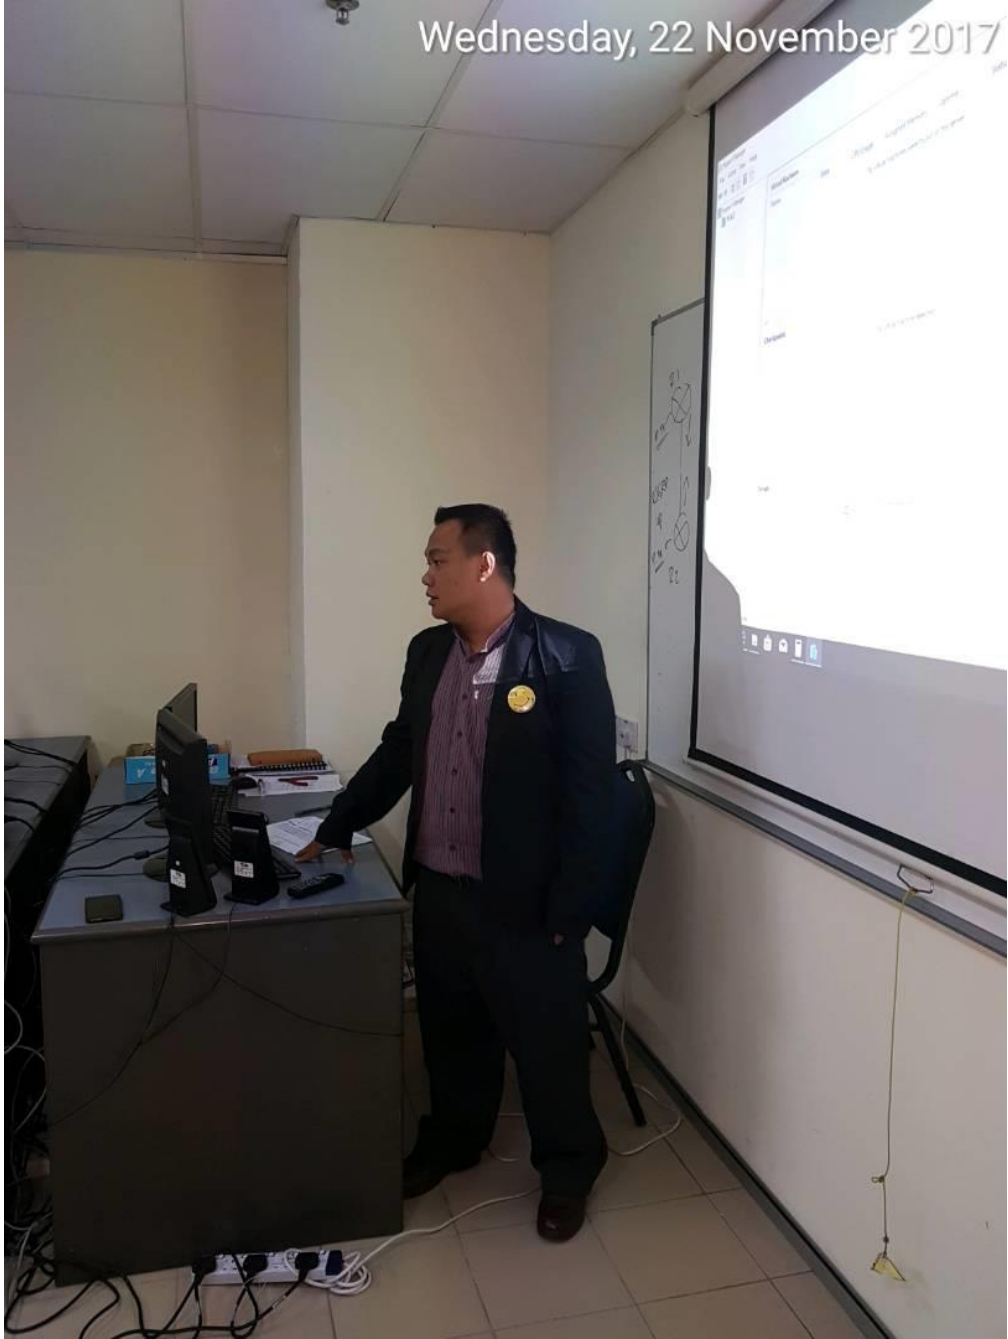

The MCSA training are divided into three major module. 70410 for Installing and Configuring Windows Server 2012. 70411 for Administering Windows Server 2012. The last module 70412 Configuring Advanced Infrastructure Windows Server 2012.

All student satisfied with the training and they all are also hoping that in the future AMC will provide the next level of the courses which are MCSE (Expert Level).
